SiriusXM is committed to integrity, excellence, and diversity among its employees.

“To be as strong as possible, our employees need to reflect both the diversity of the work force at large as well as our own current and future subscriber base. Diversity is essential to ensure that a company represents and reaps the benefit of different voices, different experiences and different points of view. With diversity of thought, you lay the groundwork for the most vibrant collaboration and the greatest innovation.

Diversity is of particular importance to our Company. As the premier provider of audio content in this country, we have both the privilege and the obligation to provide content that is compelling to those subscribers that we have today and to those we want to have tomorrow. We need diverse voices in this Company to ensure that we know what is important to all of our potential listeners.

This is a Company where we want to value people’s differences and celebrate diversity. Diversity is not something that we can be passive about. Diversity must be actively pursued”.

Mel Karmazin - CEO

2012 Keynote Presenters

MANSON K. BROWN

Vice Admiral, United States Coast Guard Deputy Commandant for Mission Support

Vice Admiral Manson K. Brown assumed the duties as the second Deputy Commandant for Mission Support (DCMS) in May 2012. He is responsible for all facets of support for the Coast Guard's diverse mission set through oversight of human capital, lifecycle engineering, acquisitions, telecommunications and information technology, and thirteen support Bases around the Nation.

Vice Admiral Brown is a native of Washington, DC. A 1978 graduate of the U.S. Coast Guard Academy with a Bachelor of Science degree in Civil Engineering, he also holds Master of Science degrees in Civil Engineering from the University of Illinois at Champaign-Urbana and National Resources Strategy from the Industrial College of the Armed Forces. He is a registered professional civil engineer.

Vice Admiral Brown's previous commands include Coast Guard Pacific Area and Defense Force West, the 14th Coast Guard District, Maintenance and Logistics Command Pacific, Sector Honolulu, and Group Charleston. From 1999 to 2002, he served as the Military Assistant to the U.S. Secretary of Transportation, including duty as the Acting Deputy Chief of Staff for six months after the terrorist attacks of September 11, 2001. In May 2003, he served as the Chief of Officer Personnel Management at the Coast Guard Personnel Command. From April to July 2004, he was temporarily assigned as the Senior Advisor for Transportation to the Coalition Provisional Authority in Baghdad, Iraq. Working in a combat zone, he oversaw restoration of Iraq's major transportation systems, including two major ports.

Previous tours of duty include Assistant Engineering Officer aboard the icebreaker GLACIER, Project Engineer at Civil Engineering Unit Miami, Deputy Group Commander at Group Mayport, Engineering Assignment Officer in the Officer Personnel Division at Coast Guard Headquarters, Facilities Engineer at Support Center Alameda, and Assistant Chief, Civil Engineering Division at Maintenance and Logistics Command Pacific.

Vice Admiral Brown's many military decorations include the Coast Guard Distinguished Service Medal, the U.S. Transportation Secretary's Gold Medal, the Legion of Merit, and Iraq Campaign Medal. In 1994, Vice Admiral Brown was honored as the first recipient of the Coast Guard's Captain John G. Witherspoon Award for Inspirational Leadership.

2012 Keynote Presenters

PAMELA GILLIAM

**President and CEO
Infotek International, Inc.**

Pamela Gilliam is a dynamic, motivating and humorous keynote speaker, trainer and facilitator for groups of all sizes. Ms Gilliam is a talented storyteller; she has a passion for people, business and life. The inspiration Ms Gilliam transmits in her speeches has personal and professional applications that are unforgettable and valuable. After growing up in Baltimore, MD with her mother and older sister, Pamela left for college in Ripon Wisconsin to major in Political Science. After matriculating for only one year she transferred to Towson University (TSU). She graduated from TSU with a degree in Mass Communications with the intent of producing and directing television shows and movies. She also graduated with a degree in Computer Science from University of Maryland University College (UMUC) while she was a wife and holding down a fulltime job as a junior FORTRAN programmer. She pursued a career as an Ada programmer. Ada was designed under contract to the United States Department of Defense (DoD) to supersede the hundreds of programming languages then used by the DoD. As the Digital Equipment Corporation (DEC) technical lead for the five initial test sites of the DoD, Ms Gilliam was called to present to President Ronald Regan's Joint Chiefs of Staff the benefits and features of DEC Ada. In the years that span her career Gilliam has been a photographer, personal trainer, programmer, software engineer, enterprise architect, information technology trainer, golf instructor and entrepreneur. Some of Gilliam's highlights include the following:

- Ms Gilliam as the Department of Defense High Performance Computing Modernization Program (HPCMP) Science, Technology, Engineering and Mathematics (STEM) Program Manager has worked with students, universities and National Laboratories around the country to create and enhance the work experience for minority students for over five years. Ms Gilliam will represent the HPCMP at the Super Computing 2012 (SC12) conference as a co-chair of the SC12 Student Job Fair later this month.
- Gilliam was the database architect for damage control system on the Zumwalt (DDG-1000) class of United States Navy destroyers, designed as multi-mission ships with a focus on land attack. The Zumwalt takes the place of battleships in filling the former congressional mandate for naval fire support, though the requirement was reduced to allow them to fill this role. Gilliam also provided Data Driven Modeling and Simulation (DD M&S) solutions to our customers. One example is the NAVAIR General Arrangements Maintenance and Manpower Analysis (GAMMA) Simulator for the Gerald R. Ford-class aircraft carriers (CVN 21) to improve sortie generation.
- Ms Gilliam became the first Director of Management Information Systems (MIS) for Network Solutions, Inc. (NSI). NSI was an 8(a) small business which was awarded the sub-contract under the U.S. Defense Information Systems Agency (DISA) for domain name registry. The contract gave NSI the sole authority to develop the system and issue Web addresses ending with ".com", ".net", ".org", ".edu" and ".gov", domain names such as **bdpa.org** or **bowiestate.edu** had to register to enter the Internet through NSI.

Ms Gilliam now resides in the Washington Metropolitan Area and is an avid golfer and seasoned photographer.

CG Cutter Thetis

I FOUND MY MISSION: TO SAVE LIVES.

Choosing a college was a big decision. I wanted more than an education; I sought a greater purpose in keeping with God's plan. After many family discussions and a lot of prayer, I was blessed to find the U.S. Coast Guard Academy. There not only did I receive leadership training in a nationally ranked baccalaureate program, I got to turn my knowledge into actions that save lives. The friends I made there will support me well into the future, both at Flight School and in Congress—where I intend to lead upon completing my Coast Guard commitment. Preparation for a lifetime of humanitarian service: It's why the Academy is like no other college in the nation.

*-Ensign Josh Wofford
King George, VA*

- CGA Class of 2011 Graduate – B.S. Electrical Engineering
- CGA's Top Finisher – NCAA All-New England Indoor Track Championships
- Ensign, U.S. Coast Guard – CG Cutter Thetis, Deck Watch Officer
- Interdicted 85 Migrants – provided food, water, shelter and medical care

National Naval Officers Association, Inc

Science, Technology, Engineering, and Mathematics

Do you consider yourself the next Einstein? Can picture you developing or even flying the next generation vehicles, finding the cure for fatal diseases, astronaut, etc?

NNOA STEM can help you realize these goals. Our objective is to stimulate interest in, knowledge of, and study in Science, Technology, Engineering, & Mathematics programs to develop an educated and well-prepared workforce, which meets the naval and national competitive needs. We offer:

- ❖ Scholarships to high school graduating seniors
- ❖ Scholarships to current college/university junior or seniors
- ❖ Mentoring from professionals

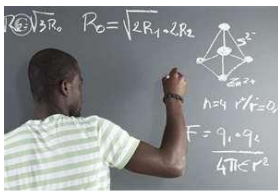

All applicants must be U.S. citizens and enrolled in Tier 1 or 2 technical academic majors at a regionally accredited college/university.

Points of Contact:

Mr. Bernard Jackson, Principal Program Manager @ (703) 655-9432 or StemProgramManager@nnoa.org

Mr. Matthew Bowman, Asst. Program Manager @ (352) 234-0411 or hamptonroads999@aol.com

Ms. Bea Henderson, Scholarship Management @ (703) 231-8554 or ea@nnoa.org

New Challenges Call for New Leaders

We're Charting a NEW COURSE in Minority Business Development

The goal of the Center for Minority Business Development (CMBD) is to narrow the participation gap between minority and non-minority owned businesses in Prince George's County by helping Local Minority Business Enterprises (LMBE) build the capacity to compete.

Our innovative approach includes:

- LMBE Accelerator Program
- Entrepreneurial Development Program
- Technical Assistance
- Executive Coaching

INNOVATIVE BUSINESS EXCELLENCE

Call the CMBD to learn how we can help you grow your business
