▲ Mignon Clyburn, Commissioner,
Federal Communications Commission (FCC)

Mignon Clyburn served as Acting Chairwoman of the Federal Communications Commission, following her appointment by President Barack Obama on May 20, 2013. She was nominated for her first term as Commissioner on June 25, 2009 and sworn-in on August 3, 2009. As Commissioner, she is serving a second term for which she was sworn in on February 19, 2013.

Alexandria, VA—During a visit to a local high school in northern Virginia, FCC Commissioner, Mignon Clyburn blogs about recent discoveries and offers insights into an exciting STEM model for tomorrow’s workforce.

In her blog, “Innovation Afternoons” is promoted as an integral part of a program whereby dedicated teams of business leaders, entrepreneurs and educators continue to nurture pipelines of diverse future STEM leaders.

These community leaders also fund, launch and sustain “computer clubhouses” in partnership with local governments, businesses and nonprofits.

We Are a Force to Be Reckoned With

For us diversity is a whole lot more about character and life experience than about who your parents are. We're looking for talented professionals, like you, who bring skill and commitment to the workplace, as well as the perspective and creativity that comes from authentic cultural backgrounds. That's the diversity we seek. That's the diversity that makes us strong and feeds our success. And at 180,000 strong we are a force to be reckoned with.

**INFORMATION TECHNOLOGY
SENIOR MANAGEMENT FORUM**Fostering the career growth
of African-American executives

ITSMF's mission is to increase the level of African-American representation at senior-levels of IT through executive leadership development programs, networking initiatives, formal mentoring and strategic partnerships.

In November of 2014, the Information Technology Senior Management Forum (ITSMF) will convene its fourth quarter (4Q14) IT Senior Management Symposium in Paradise Island, Bahamas.

Continue and accelerate your journey to the C-Suite while exploring timely and relevant topics critical to your professional development. Throughout the year members and corporate partners gather at Symposiums, networking events and conferences to build rewarding professional and personal relationships. Learn, share and network with other Technology executives in an atmosphere of trust, camaraderie and openness.

BDPA, formerly known as *Black Data Processing Associates*, was founded in 1975 to promote professional growth and technical development to those in or entering information and communications technology (ICT) career fields and related industries. Now in its 39th year (*Volume 39*) National BDPA (NBDPA) Chapters publish quarterly or monthly newsletters. For newsletter or web portal advertising rates, publication schedules, online calendars, and e-newsletters, contact regional or local BDPA Chapters by visiting www.bdpa.org or by calling **301.584.3135**. [bdpatoday](http://bdpatoday.org) (ISSN **1946-1429**) is published by participating Local Chapters of NBDPA with their respective chapter Communications Committees, mailed to BDPA members, BDPA corporate sponsors and electronically delivered to BDPA Chapters and Chapter Interest Groups (CIGs) as a benefit of membership. Cyberstates: The Definitive State-by-State Analysis of the U.S. High-Tech Industry

With tech industry jobs representing 5.4 percent of the private sector workforce and paying higher average salaries, fully understanding the tech industry's significant contribution to the economy is critical. The *TechAmerica Foundation's* 2013 *Cyberstates* report is the authoritative analysis of the high-tech job market in the United States.

Key National Findings

- U.S. tech employment totaled 5.95 million in 2012.
- Tech employment was up in 2012 by 67,400, or by 1.1 percent.
- The software services sector added 63,900 jobs in 2012, a 3.5 percent increase.
- The tech industry paid an annual average wage of \$93,800 in 2012, 98 percent more than the average private sector wage of \$47,400.
- Tech industry annualized payroll totaled \$558 billion in 2012.

Key State Findings

- The leading states by high-tech employment in 2012 were California (968,800), Texas (485,600), New York (318,200), Virginia (285,400), and Florida (270,900).
- By rate of growth, North Dakota (+4.1%), Michigan (+3.8%), and Missouri (+3.1%) led the nation.
- Virginia continued to lead the nation in concentration of high-tech workers in 2012, with 9.8 percent of its private sector workforce employed by tech.
- California's tech industry workers were paid the highest annual average wage of \$123,900 in 2012, followed by Massachusetts (\$116,000) and Washington (\$110,200).
- Eight states had tech wages that were on average more than twice that of the overall private sector wage. They are, in order of highest differential, California, Washington, Idaho, Oregon, New Mexico, Virginia, Arizona, and North Carolina.

Washington Convention Center in Washington, D.C. panel discussions.

*The more viewpoints
we have, **THE FURTHER
WE CAN SEE.***

At Northrop Grumman, diversity isn't just a policy, it's a principle. We bring together people of different cultures, experiences, ideas, genders—thousands of perspectives working toward a single goal: global security. We're successfully protecting the planet—not just because of our individual talents but because of our collective strengths. We'll value your contribution to our mission, and support you through training and employee resource groups.

We have a long history of drawing strength from our differences. In fact, *DiversityInc* has named us one of the Top 50 Companies for Diversity—an honor we've proudly held since 2010, when we were the first defense company to make the list.

Across our career areas and around the globe, we see the value of our performance every day. We are Northrop Grumman. And freedom is **at the heart of what we do.**

For opportunities in Engineering, IT, Assembly, and other career areas, visit careers.northropgrumman.com

THE VALUE OF PERFORMANCE.

NORTHROP GRUMMAN

Opportunity Abounding in STEM

by: Mignon Clyburn

You would have been both amazed and encouraged if you had accompanied me across the Potomac River to northern Virginia recently. I had the pleasure of spending a stimulating afternoon at T.C. Williams High School in Alexandria, the real-life high school made famous by the inspirational hit movie, “Remember the Titans”. But the buzz surrounding this day was not about the football team; it was all about technology and innovation, and how tech executives, entrepreneurs, developers and policy makers came together to engage and inspire students to pursue careers and entrepreneurial opportunities in science, technology, engineering and math (STEM).

“*Innovation Afternoons*” is part of a program in which an earnest and committed group of business leaders, entrepreneurs and educators are nurturing a pipeline of diverse future STEM leaders. Under the banner of the Equal Footing Foundation, community leaders also fund, launch and sustain “computer clubhouses” in partnership with local governments, businesses and nonprofits.

The result is an innovative, after school learning center where students 8-18 can work with adult mentors to learn, develop and explore their interests as future STEM leaders. Many of these students do not independently have access to technology, so the computer clubhouse is their gateway to the web and all that it holds for young technologists. Today, this program supports 1,500 students every week, and hosts 30,000 individual visitors every year. It has been recognized and awarded for outstanding academics, citizenship and peer-to-peer mentoring.

Official White House Photo by Amanda Lucidon

▲ First Lady Michelle Obama and Education Secretary Arne Duncan talk with students working on FAFSA (Free Application for Federal Student Aid) forms during a workshop at T.C. Williams High School in Alexandria, Virginia.

As we sat in the activity room with dozens of students who trace their roots from all over the world, I was challenged by their questions, impressed by their intellect and depth of knowledge of science and technology. I came away convinced more than ever that, as our world moves decisively toward a comprehensive IP framework, we can ill-afford to leave anyone behind. Programs such as those sponsored by the Equal Footing Foundation provide notable engagement and interconnections for industry, educators and students and foreshadow a bright future for aspiring STEM leaders in communities around the nation. It is a good example of what an inspired and dedicated group of business, community, and educational leaders can accomplish on their own and that there are hundreds of talented and curious young people who are willing and able, right across the river.

Advanced Spectrum Sharing in “Urban Test Cities”

The President’s Council of Advisors on Science and Technology (PCAST) recommended the creation of an “urban Test City” to “support rapid experimentation” of advanced spectrum sharing technologies. The Joint Public Notice seeks to start the process of transforming this recommendation from an idea to reality. We have chosen to use the term “Model City” to better reflect the idea that systems or networks might be developed that could serve as a model for spectrum sharing techniques that can be deployed elsewhere. Discover more at FCC.gov and *Popular Technology TV* (PTTV).

CAUCUS *continued from page 7*

strategies to broaden participation in the sciences and to inspire minority youth to pursue careers in Science, Technology, Engineering and Math (STEM). The Brain Trust brings together celebrities, community leaders, and mentors to achieve this goal.

Science, Space, and Technology Committee

The Science, Space, and Technology Committee, which has jurisdiction over programs at NASA, the Department of Energy, the Environmental Protection Agency, the National Science Foundation, the Federal Aviation Administration, and the National Institute of Standards and Technology. The Committee oversees agency budgets of \$39 billion, where the primary focus is on research and development. This committee promotes legislation that encourages scientific discoveries, space exploration, and new technologies.

Far from Ordinary

The U.S. is under cyber attack, every minute of every day. That's why cyberspace has become today's new front line. What you know can make a difference at the National Security Agency. Whether it's collecting foreign intelligence or preventing foreign adversaries from accessing U.S. secrets, you can protect the nation by putting your intelligence to work. Explore technology that's years ahead of the private sector. Plus exciting career fields, paid internships, co-op and scholarship opportunities. See how you can be a part of our tradition of excellence and help the nation stay a step ahead of the cyber threat.

KNOWING MATTERS

Excellent Career Opportunities in the Following Fields:

- Computer/Electrical Engineering
- Computer Science
- Cybersecurity
- Information Assurance
- Mathematics
- Foreign Language
- Intelligence Analysis
- Cryptanalysis
- Signals Analysis
- Business Management
- Finance & Accounting
- Paid Internships, Scholarships and Co-op
- >> Plus other opportunities

Opportunities & Careers

MARYLAND, USA— The National Security Agency (NSA) is now accepting applications directly from **High School Seniors** for their coveted Summer 2015 - Gifted and Talented STEM Program (G&T). The Agency's G&T

Program is a 10-12 week summer internship designed to introduce current graduating high school students who possess outstanding academic credentials in the areas of science, technology, engineering,

and mathematics (STEM) to support the Agency's missions. This program provides a tremendous opportunity to gain valuable work experience in the area of STEM. Students will be given meaningful and engaging opportunities to utilize and enhance their technical skills. They will work closely with mentors and coworkers on projects that truly make an impact to our country. Students will be placed in an office related to their areas of interest and aptitude and will also have the chance to experience very unique tours of the Agency's ultra-high tech facilities. The program's full description is available on the Agency's [career website](#).

BDPA Members, if you know students interested in this wonderful opportunity, share this information and ask students to apply no later than **October 31st**.

Applications are accepted online at www.nsa.gov/careers, select Job Search/Apply Online and keyword search for **Gifted and Talented** program, use **Job ID #1050288**. 

#BDPA15: Partner with us August 17-23, 2015

CALIFORNIA, USA—What better way to get into the game industry than by working as an intern or co-op for Electronic Arts, Inc. (EA?) EA offers paid internships or co-op positions (pay ranges vary depending on location, experience and skills), so you can actually get paid for working on games. EA will also include your name in the game credits - how cool is that? Better yet, an EA internship or co-op just might lead to a career with EA after upon graduation.

An EA internship/co-op is a great way to get real-world

Photo © Electronic Arts, Inc.

experience in our rapidly evolving gaming industry. You get hands-on experience working on actual projects, and the team you're working with benefits from your fresh perspective. EA is very confident that once you've sampled life at EA you'll want to come back after graduation.

EA operates its global headquarters in Redwood Shores, CA, with other US studio locations in Los Angeles, CA (**BDPA LA**), Orlando, FL (**BDPA Orlando**), Fairfax, VA (**BDPA NoVA/BDPA-DC**), and Salt Lake City, UT.

Regardless of where you work in the EA World, you're sure to be working with passionate, creative co-workers driven by the same goal - to make the world's best games. BDPA Student Members are invited to contact local BDPA chapters via BDPA.org for additional details. Discover more by visiting <https://careers.ea.com>.

National BDPA 40th Anniversary Gala TECH Conference & Career Expo

A TECH & MEDIA EVENT | Washington, D.C. • AUG 17-23, 2015

WASHINGTON, DC—Next year's National BDPA Technology Conference *Host Chapters* are BDPA Washington, D.C. (BDPA-DC) and BDPA Northern Virginia (BDPA NoVA.) Members, Professionals, and Students attending next year's career fair will discover top employers from our Information and Communications Technology (ICT) industry's high growth market segments. Attendees are afforded numerous opportunities to network with IT professionals from all vertical markets and take full advantage of National BDPA's resources designed to enhance relationship building with hiring managers or corporate buyers. Moreover, senior IT and cybersecurity career opportunities with national job searches are provided to enhance professional and academic IT careers.

BDPA Sponsors and Exhibitors leverage opportunities to enhance their visibility across STEM, ICT, Cloud, Big Data, and Cybersecurity special interest groups (SIGs) to identify and recruit new hires directly from top talent pools available from national BDPA Chapters and chapter cities.

Our National High School Computer Competition (HSCC) and collegiate IT Showcase (ITSC) programs also provide opportunities for industry and academia to directly connect with students from local BDPA chapters, including qualified HSCC and ITSC student pipelines, to close digital divides and develop tomorrow's IT workforce. BDPA has added a National Mobile App Development Showcase to its portfolio to increase student participation. Whether you are in the job market or not, in 2015, don't miss National BDPA's 40th Anniversary celebrations, Technology Conferences, new Career Expos, industry reunions, and local BDPA Chapter 40th Anniversary events. [lit](#)

2015 National BDPA Conference Call

By virtue of the authority vested in me as National President of NBDPA and in accordance with the mandates of **Article VIII**, Sections **§8.1** and **§8.2**, of the National By-Laws for National BDPA; it is my distinct pleasure to announce the call for assembly of the **2015 Annual Delegates Meeting** and your **37th Annual National BDPA Technology Conference**.

Our site for next year's National BDPA Technology Conference shall be Washington, District of Columbia—with BDPA Washington, D.C. (BDPA-DC) and BDPA Northern Virginia (BDPA NoVA) serving as our Host Chapters. The Washington Hilton is your official headquarters hotel for our assembly, Career Fair, Technology Expo, National High School Computer Competition (HSCC) scholarship round, National IT Showcase (ITSC) scholarship round, National Mobile App Development scholarship round, and our annual national Youth Technology Camp (YTC.)

Said National BDPA Technology Conference shall take place during the time period August 17th through August 23rd, 2015—with our formal **40th Anniversary Banquet and Awards Gala** on the evening of Saturday, August 22nd, 2015. BDPA Chapters, BDPA members, Corporate Sponsors, and stakeholders are hereby notified of the time and place for 2015's National BDPA Technology Conference and Career Fair. Take full advantage of your annual memberships, discounts, and color sponsorships available to your organizations in our corporate portfolio and rate cards.

BDPA Chapters are directed to make appropriate plans to ensure their Executive Committees, Delegates, new members, student members, participating High School Computer Competition teams, IT Showcase teams, and Mobile App Development teams have successfully pre-registered prior to March 31, 2015. I look forward to our reunion and industry meetings next August in Washington!

U.S. Army Recruiting Next-Generation Cyber Workforce for new Career Fields

Deputy to the Commander of Army Cyber Command , delivers remarks this month with AFCEA

WASHINGTON, D.C.—Ronald Pontius, the deputy to the commander of Army Cyber Command, said the professional cyber-trained forces in the United States Army will be head north of 5,000 to approximately 6,000 soldiers, Army strong. These were the latest comments Pontius made shortly after a recent panel discussion sponsored by the Washington Chapter of the Armed Forces Communications and Electronics Association (AFCEA D.C.)

"We are working on that now and more will emerge over the next few months. A lot of times these things take many years, but there is very strong leadership support to make this happen in the next year or two," Pontius said. "It's being worked out of the Cyber Center of Excellence in Fort Gordon, Georgia. That's a recent standup. The signal center of excellence that also has electronic warfare has been refashioned to be the Cyber Center of Excellence."

In a recent article from *Federal News Radio*, Pontius said a professional cyber career field is the next evolution of a decision made two years ago by then-Defense Secretary Leon Panetta for the services to have cyber mission forces.

"There are people being recruited and trained right now," he said. "Each of the military services will do it in their own way. The Army is looking to train and sustain the really very high speed cyber operators from a range of defensive and offensive capabilities. It takes a lot of training and emphasis and they really need to be managed very carefully, and that's what the Army is thinking."

SiriusXM is committed to integrity, excellence, and diversity among its employees.

“To be as strong as possible, our employees need to reflect both the diversity of the work force at large as well as our own current and future subscriber base. Diversity is essential to ensure that a company represents and reaps the benefit of different voices, different experiences and different points of view. With diversity of thought, you lay the groundwork for the most vibrant collaboration and the greatest innovation.

Diversity is of particular importance to our Company. As the premier provider of audio content in this country, we have both the privilege and the obligation to provide content that is compelling to those subscribers that we have today and to those we want to have tomorrow. We need diverse voices in this Company to ensure that we know what is important to all of our potential listeners.

This is a Company where we want to value people’s differences and celebrate diversity. Diversity is not something that we can be passive about. Diversity must be actively pursued”.

Apple and IBM Forge Global Partnership to Transform Enterprise Mobility

CUPERTINO, California and ARMONK, New York— Apple® and IBM announced an exclusive partnership that teams the market-leading strengths of each company to transform enterprise mobility through a new class of business apps—bringing IBM’s big data and analytics capabilities to iPhone® and iPad®.

The landmark partnership aims to redefine the way work will get done, address key industry mobility challenges and spark true mobile-led business change—grounded in four core capabilities:

- a new class of more than 100 industry-specific enterprise solutions including native apps, developed exclusively from the ground up, for iPhone and iPad;
- unique IBM cloud services optimized for iOS, including device management, security, analytics and mobile integration;
- new AppleCare® service and support offering tailored to the needs of the enterprise; and
- new packaged offerings from IBM for device activation, supply and management.

The new IBM MobileFirst for iOS solutions will be built in an exclusive collaboration that draws on the distinct strengths of each company: IBM’s big data and analytics capabilities, with the power of more than 100,000 IBM industry and

SC14

New Orleans, LA

hpc matters.

SC14: High Performance Computing (HPC) Matters

Louisiana, USA

New Orleans, LA—HPC is helping to solve our hardest problems in the world. Innovations from our community have far reaching impact in every corner of science, all the way to investment banking, in the discovery of new drugs, to the precise prediction of the next superstorm. For more than two decades, the SC Conference has been the place to build and share the innovations that are making these life-changing discoveries possible.

In November of 2014, SC is going back to New Orleans with new ideas and a fresh take on HPC. Spotlighting the most original and fascinating scientific and technical applications from around the world, SC14 will once again bring together the HPC community – an unprecedented array of scientists, engineers, researchers, educators, students, programmers, system administrators, and developers – for an exceptional program of technical papers, tutorials, timely research posters, and Birds-of-a-Feather (BOF) sessions.

The SC14 Exhibition Hall will feature exhibits of the latest and greatest technologies from industry, academia and government research organizations; many of these technologies will be seen for the first time in New Orleans. Mark your calendar and make your way to New Orleans. No city offers the same extraordinary mix of food, music, culture, and history; and no conference offers a better opportunity to view the why HPC matters.

Join the community in November to share our collective accomplishments and to engage in important conversations of how we make HPC Matter to our lives, our future, our communities and our world. 

Army Cyber from page 18

The Army's need for a dedicated cyber workforce will increase as it moves more and more to Joint Regional Security Stacks (JRSS). In fact, the Army and Air Force reached initial operating capability (IOC) for its first JRSS in the continental United States (CONUS) this month in Texas at Joint Base San Antonio.

Pontius said the impact of the JRSS is hard to quantify yet, but he knows there will be network and cyber improvements. The JRSS is expected to give the Army better situational awareness and the ability to defend networks more effectively.

domain consultants and software developers behind it, fused with Apple's legendary consumer experience, hardware and software integration and developer platform. The combination will create apps that can transform specific aspects of how businesses and employees work using iPhone and iPad, allowing companies to achieve new levels of efficiency, effectiveness and customer satisfaction—faster and easier than ever before.

As part of the exclusive IBM MobileFirst for iOS agreement, IBM will also sell iPhones and iPads with the industry-specific solutions to business clients worldwide.

"iPhone and iPad are the best mobile devices in the world and have transformed the way people work with over 98 percent of the Fortune 500 and over 92 percent of the Global 500 using iOS devices in their business today," said Tim Cook, Apple's CEO. "For the first time ever we're putting IBM's renowned big data analytics at iOS users' fingertips, which opens up a large market opportunity for Apple. This is a radical step for enterprise and something that only Apple and IBM can deliver."

"Mobility—combined with the phenomena of data and cloud—is transforming business and our industry in historic ways, allowing people to re-imagine work, industries and professions," said Ginni Rometty, IBM Chairman, President and CEO. "This alliance with Apple will build on our

BDPA Northern Delaware 2nd Annual STEM Summit

Saturday September 27, 2014 9:00 am – 4:00 pm

Wilmington University Audrey K. Doberstein Admissions Center
320 N. DuPont Highway New Castle, DE 19720

Come join us for a day of Innovation!

Have fun and learn more about the business of Science, Technology, Engineering, and Mathematics!

The STEM Summit will provide the opportunity for members of the community to learn about STEM based careers from successful representatives of the STEM workforce.

Program Highlights:

Registration & Hospitality

9:00am – 9:20am

Check In at the hospitality desk and enjoy a cup of coffee.

Welcome

9:20am – 10:00am

Welcome Address with Guest Speaker

Data Management Panel

10am – 11am

Panel of experts in various disciplines within the Data Management field. Panel will present information on Data Governance, Business Intelligence and much more...

Girl Tech Talk

11:15 pm – 12:30pm

Round table discussion on the rewards and challenges of being a female in a male dominated industry.

Rules of the Game

11:15 pm – 12:30pm

Shared insights on how to maximize career opportunities and prepare for the transition from the classroom to the workplace.

Lunch

12:30 pm – 1:30pm

STEM

Science • Technology • Engineering • Math

STEM Industry Networking

1:30pm – 3:30pm

Explore the growing list of career opportunities for the STEM savvy individual. Talk with CIO, CTO, Systems Architect, Business Analyst, Data Informatics Expert, Application Developer, Technology Operations Expert and many others. Let experts in the various job skill sets share insights on their daily activities and the requirements to secure a position in that field.

STEM Fair

1:30pm – 3:30pm

Visit one or better yet all of the hands on STEM stations to experience a taste of Gaming, Aviation, Robotics, Cyber Security, Graphic Design, Mobile Application Development and Math Made Easy. Receive a raffle ticket at each station for the chance to win a Apple iPad mini.

Note: Winner must be present to win!

RSVP Online at www.bdpa-de.org

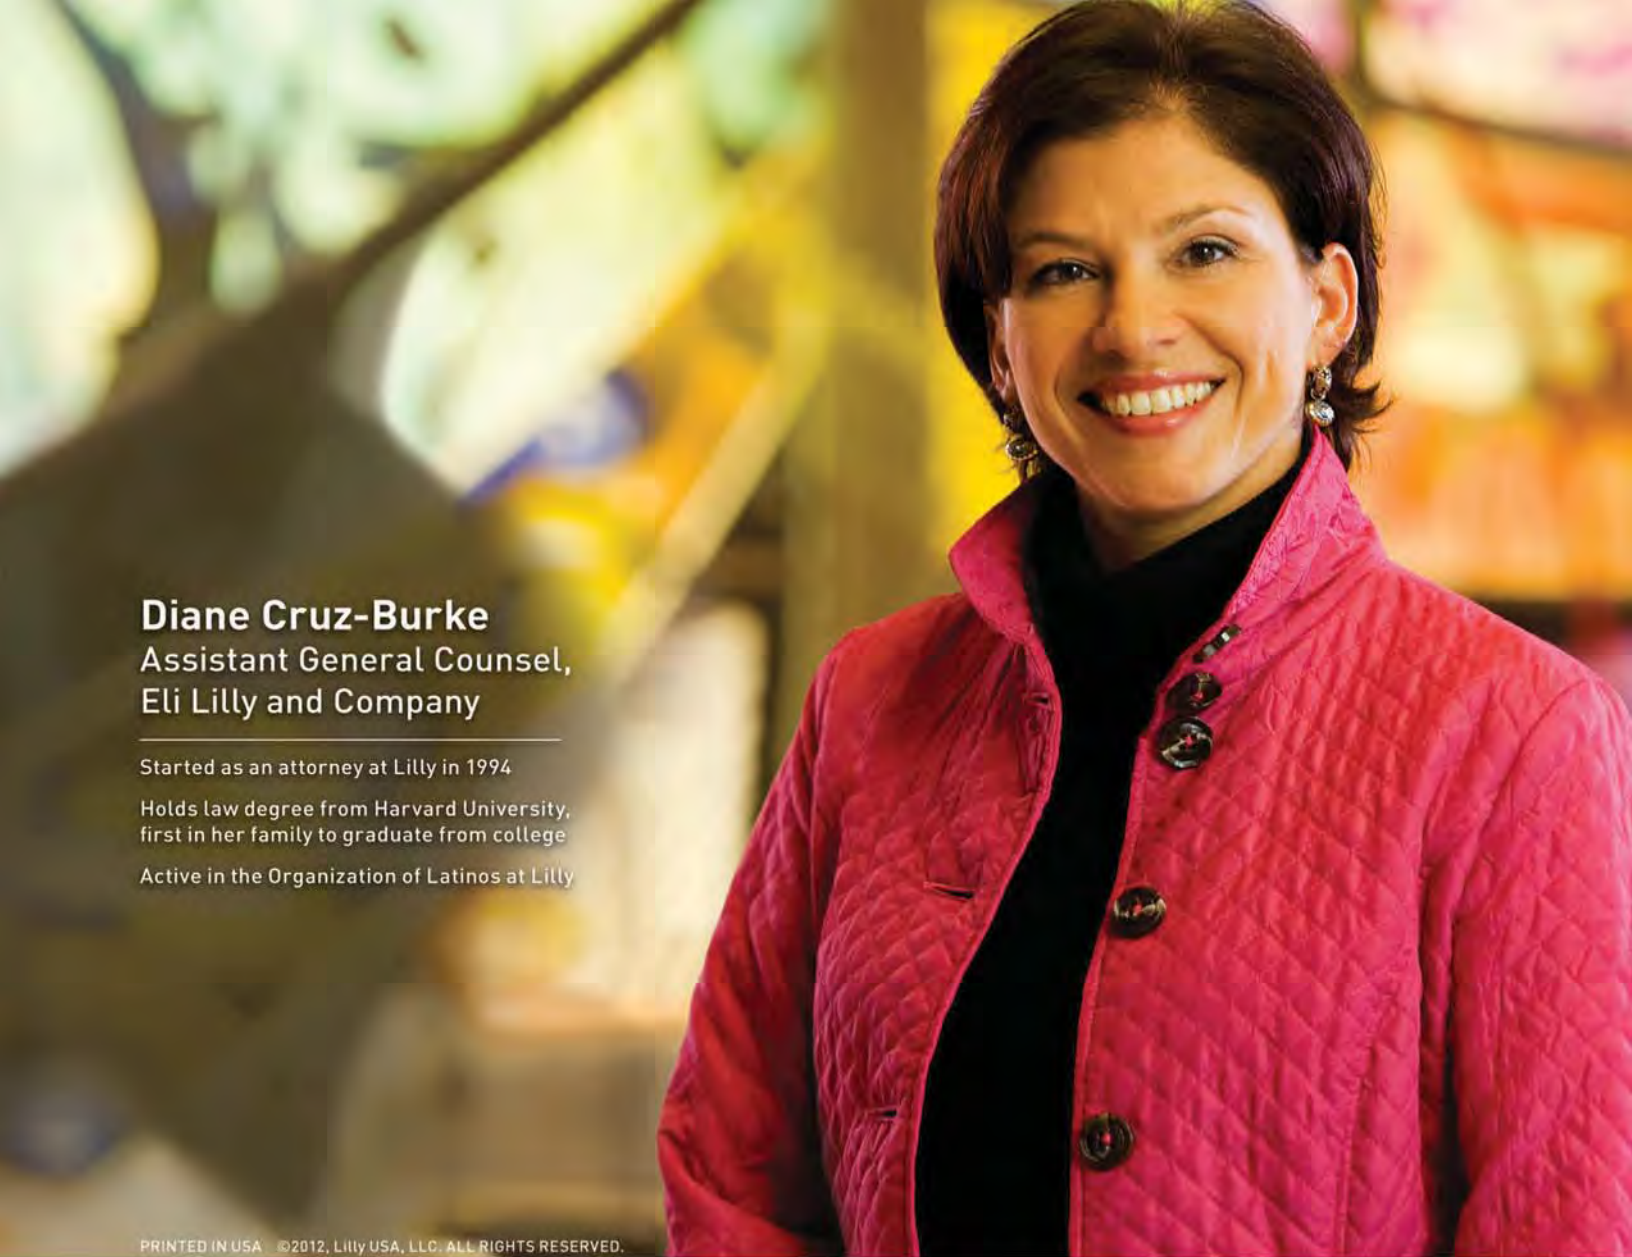

No Cost to Attend

Donations are welcome online at www.bdpa-de.org

Part of my fabric.

Both of my parents come from large families that migrated to the mainland U.S. from Puerto Rico when they were very young. They watched their parents struggle and never get ahead. But, they were determined that one day their own children could realize a better future.

Growing up in a close, extended family exposed me to a variety of challenges. We depended on one another, and for me that meant taking on huge responsibilities, even at a young age. At times, this

could be emotionally draining, but it taught me how strong I really was. With the support of my family, I learned that problems are really opportunities to reshape the things we're not happy with. Anything is possible with persistence and focus.

This is an important part of my fabric. It's what makes me passionate about life and our mission to affect improved patient outcomes. Just as I have personally overcome challenges, I hope to use these experiences to positively impact the lives of others.

Answers That Matter.

momentum in bringing these innovations to our clients globally, and leverages IBM's leadership in analytics, cloud, software and services. We are delighted to be teaming with Apple, whose innovations have transformed our lives in ways we take for granted, but can't imagine living without. Our alliance will bring the same kind of transformation to the way people work, industries operate and companies perform."

Apple and IBM's shared vision for this partnership is to put in the hands of business professionals everywhere the unique capabilities of iPads and iPhones with a company's knowledge, data, analytics and workflows. Specifically, the two companies are working together to deliver the essential elements of enterprise mobile solutions:

- Mobile solutions that transform business: The companies will collaborate to build IBM MobileFirst for iOS Solutions—a new class of “made-for-business apps” targeting specific industry issues or opportunities in retail, healthcare, banking, travel and transportation, telecommunications and insurance, among others, that will become available starting this fall and into 2015.

- Mobile platform: The IBM MobileFirst Platform for iOS will deliver the services required for an end-to-end enterprise capability, from analytics, workflow and cloud storage, to fleet-scale device management, security and integration. Enhanced mobile management includes a private app catalog, data and transaction security services, and productivity suite for all IBM MobileFirst for iOS solutions. In addition to on-premise software solutions, all these services will be available on Bluemix—IBM's development platform on the IBM Cloud Marketplace.

- Mobile service and support: AppleCare for Enterprise will provide IT departments and end users with 24/7 assistance from Apple's award-winning customer support group, with on-site service delivered by IBM.

- Packaged service offerings: IBM is introducing IBM MobileFirst Supply and Management for device supply, activation and management services for iPhone and iPad, with leasing options.

Announced at Apple's Worldwide Developer Conference in June and available later this year, Apple's iOS 8 is the biggest release since the launch of the App StoreSM, giving users incredible new features and developers the tools to create amazing new apps. For enterprise, iOS 8 builds on the new IT model for a mobilized workforce by improving the way users are informed of how their devices are configured, managed or restricted, with expanded security, management and productivity features.

Apple designs Macs, along with OS X, iLife, iWork and professional software. Apple leads the digital music revolution with its iPods and iTunes online store. Apple has reinvented the mobile phone with its revolutionary iPhone and App Store, and is defining the future of mobile media and computing devices with iPad.

IBM's 5,000 mobile experts have been at the forefront of mobile enterprise innovation. IBM has secured more than 4,300 patents in mobile, social and security, that have been incorporated into IBM MobileFirst solutions that enable enterprise clients to radically streamline and accelerate mobile adoption, help organizations engage more people and capture new markets.

IBM has made a dozen acquisitions in security in the past decade, has more than 6,000 security researchers and developers in its 25 security labs worldwide that work on developing enterprise-class solutions.

IBM has also established the world's deepest portfolio in Big Data and Analytics consulting and technology expertise based on experiences drawn from more than 40,000 data and analytics client engagements. This analytics portfolio spans research and development, solutions, software and hardware, and includes more than 15,000 analytics consultants, 4,000 analytics patents, 6,000 industry solution business partners, and 400 IBM mathematicians who are helping clients use big data to transform their organizations.
