bdpatoday | about us

BDPA, formerly known as **Black Data Processing Associates**, was established in 1975 and founded in Philadelphia, Pennsylvania to promote professional growth and technical development to those in or entering information and communications technology (ICT) career fields and related industries.

Now in its 47th year (**Volume XLVII**) National BDPA (NBDPA) and participating local BDPA Chapters publish daily and weekly blogs with quarterly or monthly newsletters. NBDPA's Golden Anniversary in 2025 celebrates the association's 50-year milestone and Congressional Black Caucus' CBC TECH2025 programs.

bdpatoday (ISSN 1946-1429) is a periodical published monthly and weekly by participating local BDPA Chapters of National BDPA (NBDPA) within their respective media markets by local BDPA Chapter Communications Committees.

For **bdpatoday** or web banner advertising rates, publication schedules, and online calendars with Industry events, contact regional offices or local BDPA Chapters by visiting bdpa.org or bdpatoday.com.

bdpatoday (ISSN 1946-1429) is published by participating Local Chapters of National BDPA (NBDPA) with their respective chapter Communications Committees and mailed to BDPA members, BDPA corporate sponsors or electronically delivered to local BDPA Chapters and Chapter Interest Groups (CIGs) via email or social media channels as a benefit of membership. **Popular Technology TV** (PTTV) is produced by bdpatoday with technology industry mission partners.

First Class and Periodicals postage paid at Washington, D.C. and additional regional mailing offices.

Cover photo courtesy H.O.P.E. Project DC. Unless otherwise noted by attributed credits or copyrights, all photographs, art and graphics herein are © National BDPA, © BDPADC, © bdpatoday, © PTTV, © Alamy Stock Photos and Images or © GettyImages.

Chapter publications, such as **bdpatoday**, are available for online publishing of ICT industry, chapter news, and community IT, Cyber, and STEM events. Forward advertisements, articles, calendar of events, or images with captions and credits to: info@bdpatoday.org. Readers may use National BDPA's landing page, BDPA.org, to review local events or visit www.bdpatoday.com. Advertisements, articles, announcements, OP-EDs, tweets, re-tweets, or following National BDPA on social media does not constitute an endorsement. Contributor opinions are not necessarily those of National BDPA, local BDPA Chapters, nor **bdpatoday**.

Aisha Bowe, left, founder and CEO of **STEMBoard**, and Danielle Regis, director of product at **Lingo**, teamed up to design an at-home coding kit for kids ages 13 and up. (Credit: Wes Hicks at WEH Pictures)

Great Moments in TECH, Her Story: Aisha Bowe

ARLINGTON, VA —If Aisha Bowe had followed her guidance counselor’s advice, she would be a cosmetologist... Instead, she went from an insecure and unfocused community college student to a double graduate in aerospace engineering and space systems engineering from the University of Michigan. Determined to provide the inspiration and guidance she felt she lacked, Aisha strove to make a difference.

That’s why she founded **STEMBoard**: to create engaging learning opportunities to excite more young people about STEM and to make sure that more little girls don’t grow up to have the same experience that she did. To do this, her first step was to put together a team of engineers and technologists who shared her story. She built an inclusive team comprised of others who faced similar challenges in their careers and are committed to making a difference.

Since 2013, **STEMBoard** has led hands-on workshops delivering technology and entrepreneurship programming globally. Although thousands of students have benefited from the programming, the team felt that wasn’t enough. Focused on bringing the joy of technology, science and engineering to youth everywhere, the team created Lingo.

During COVID-19 and surges in virtual learning, the **Lingo Coding Kit** is designed to unleash student creativity, inspire innovation, and help act upon countless ideas and inventions one may already have. Inside the box are contents to start an exciting journey: a “Driver’s Seat” Booklet, a Micro-controller board and breadboard, a component kit, and simple to follow instructions. Discover more today by visiting StemLingo.com. **bt**

Banking, Black Data, and BDPA

– Book Cover photo courtesy BDPA

Cover photo — In a recent *Pathways to Capital Panel*, **Raymond Bell, Jr.**, President BDPA-DC, and former Dallas Cowboys running back **Emmitt Smith** joined **Sekou Kaalund** and other banking industry executives and panelists from J.P. Morgan Chase & Co. to discuss workforce and economic development in Black communities.

NEW YORK—Structural barriers in the United States have created profound racial inequalities, made worse by the COVID-19 pandemic. Racial wealth gaps put strains on families’ economic mobility and restricts the U.S. economy. JPMorgan Chase has an **Advancing Black Pathways** (ABP) initiative harnessing their expertise in business, policy and philanthropy with an initial commitment of \$30 billion by the end of 2025 to drive an inclusive recovery, support employees and break down barriers of systemic racism. **“We’re committed to bringing the full force of our firm to provide improved access to education, job training and wealth creation for the Black community,”** said Jamie Dimon, Chairman and Chief Executive Officer of JPMorgan Chase.

The BDPA Story Set for Publication

Their new book, “The BDPA Story”, is set for publication later this spring. It is a story with its beginnings in 1975 Philadelphia about helping ordinary people grow, build, and achieve greatness across data processing careers.

Ken Wilson, Norman Mays, and Earl A. Pace, Jr. wrote this book about the *Black Data Processing Associates* — a ground breaking not-for-profit association developing diverse talent in emerging data processing industries — to memorialize dedicated technical professionals growing careers and buiding skilled communities. **bt**

National BDPA (BDPA) is no stranger to the modern banking industry. Most of BDPA’s larger chapters (bdpa.org) were chartered last century and are co-located with Federal Reserve Districts — BDPA Atlanta, Boston (BDPA Mass-Metrowest), BDPA Chicago, BDPA Cleveland, BDPA Dallas, BDPA Kansas City, Minneapolis (BDPA Twin-Cities), BDPA New York, BDPA Philadelphia, BDPA Richmond, San Francisco (BDPA Bay Area), BDPA St. Louis — Federal Reserve Bank cities, and our nation’s capital, BDPA of Greater Washington, D.C. (BDPA DC). Other highlights of BDPA’s history in ‘FinTech’, Black Data, and the banking industry follow.

- In Philadelphia, PA, National BDPA was founded in 1975 by Earl A. Pace, Jr., the late David Wimberly. Inaugural members of BDPA included local Black entrepreneurs in the tri-state area whose firms developed software or supplied banking services to local banks and the Fed. Prior to processing check data with mainframe computers, transactions were captured using typewriters and adding machines
- BDPA Philadelphia was the first local BDPA Chapter to receive its charter from National BDPA
- The Philadelphia Savings Fund Society (PSFS), along with three other Philadelphia savings banks, established a multi-million dollar pool to finance mainly low and moderate income minority families in the late 1960s. In the early 1980s, PSFS merged with the Western Savings Fund Society, receiving close to \$300 million in assistance from the Federal Deposit Insurance Corporation (FDIC). PSFS was known for its student banking program with the Philadelphia School District.

Blacks In Cybersecurity Makes History at DEF CON 29

LAS VEGAS, NV (BPRW) — Blacks In Cybersecurity known as “BIC” seeks to ignite a cultural change in the Black community through their Cybersecurity education and career pipeline initiatives. BIC seeks to educate and operate in a way to expose Cybersecurity as a hobby and outlet that can be experienced in any walk of life, in a casual and no-pressure environment. In reimagining the traditional way in which knowledge is shared and presented, and adopting a philosophy that encourages lifelong learning, skill building and “tinkering” with concepts to gain hands-on understanding, BIC seeks to change the face of what a stereotypical Cybersecurity professional or hobbyist may look like.

Since its conception in 2018, BIC has not only been the nexus for the Black Cybersecurity community in Washington, D.C. Metro area with their events and conference series but has expanded globally with over 40+ chapters referred to as “BIC@Locations” and “BIC@Campus” (University chapters) expanding across the United States, Canada, Europe and Africa.

On August 8, 2021 Blacks In Cybersecurity was able to make Black History by having the honor and privilege of being the first black owned and operated competition to be present and to present a Black Badge to the winners of their competition. The DEF CON Black Badge is a “powerful talisman”, awarded to those who have emerged unbeaten from the crucible of an elite DEF CON competition. The competition that receives this badge varies from year to year and seeks to highlight the very best in competitors. Those who receive the badge enter DEF CON free of charge for the duration of their natural life. In participating in this honored pastime of the Hacker community, BIC seeks to continue its work in creating space for and uplifting the Black community in Cybersecurity.

▲ (Above) **BDPA Members and staffing teams from Wells Fargo participate in annual BDPA Technology Conferences, trade shows, and career expos. In April, during Financial Literacy Month, Wells Fargo executives also present cybersecurity workshops with local BDPA Chapters and HBCUs to alumni, student members, and registered attendees during ‘CyberEarth’ events — the association’s annual mid-April Earth Day tech summits.** — *BDPA photo*

continued from page 6

- In the mid to late 1970’s, IBM, Bell Atlantic, Girard Bank, and The Federal Reserve Bank of Philadelphia — also known as the Philadelphia Fed or the Philly Fed — hosted local BDPA Philadelphia chapter events. In 1983, Girard Bank was acquired by Mellon Bank. Later that year, BDPA launched one of its first student chapters at Temple University
- In 1993, BDPA DC met with Hugh McColl, then NationsBank chairman, and worked with Dr. Charlene Drew Jarvis — Dr. Charles Drew’s daughter — chairwoman of the D.C. Council’s banking committee, in direct support of NationsBank’s merger of D.C. and Maryland operations. BDPA DC’s chapter testimonials and discussions with staffers included establishing a data center in Ward 8, training and upskilling bank tellers for evolving technical careers in banking, increasing local advertising and impact investments with stronger Community Reinvestment Act (CRA) compliance for technical non-profits such as BDPA and minority business enterprises (MBEs) serving our communities. NationsBank eventually became Bank of America.
- In the late 1990’s one of Bank of America’s branches in Seat Pleasant, Maryland, was converted to serve as the headquarters facility for Patriots Technology Training Center (Patriots). Patriots supported BDPA DC’s High School Computer Competition (HSCC) training sessions, NSBE Jr. engagements, and Prince George’s County Summer Youth Enrichment Program participation
- Near the turn of the century, JPMorgan Chase sponsored and co-hosted several local, regional, and national BDPA events with regional chapters in New York, New Jersey, and Delaware
- In 2017, Wells Fargo cybersecurity executives presented information security (InfoSec) and operational security (OPSEC) workshops at Howard University during *CyberEarth17*, BDPA’s inaugural Earth Day Tech Summit with IN3DC.

National BDPA and its global mission partners in banking remain uniquely positioned to jointly marshal their resources to help address and mitigate a few of the persistent technical, financial, and cybersecurity challenges facing the Black community. **bt**

In Memoriam | Colin Powell

▲ Great Moments with BDPA: National BDPA's 40th Anniversary Gala in 2015 during BDPACON15

WASHINGTON—Born in New York's Harlem neighborhood April 5, 1937, the son of immigrants from Jamaica, Colin Luther Powell began his military career at the City College of New York where he joined the Reserve Officers' Training Corps (ROTC).

Powell served as a soldier in Vietnam and was awarded a Purple Heart and a Soldier's Medal for rescuing fellow passengers from a burning helicopter despite being injured himself. During his 35-year military career, Powell also was stationed in South Korea and Germany, and oversaw military and humanitarian missions.

He was appointed chairman of the Joint Chiefs of Staff in 1989, and served in the top military post under Presidents George H.W. Bush and Bill Clinton. In that role, he guided the U.S. military through the end of the Cold War and humanitarian responses to crises, aiding famine victims in Somalia and working with the United Nations to end the war in the Balkans.

After retiring from the military in 1993, Powell served alongside former President Jimmy Carter in a three-person delegation to help Haiti transition from a military dictatorship to a democracy.

As secretary of state, Powell worked to improve U.S. relationships with Russia and China. He also supported expanding U.S. efforts to combat HIV/AIDS and malaria around the world. Powell was twice awarded the Presidential Medal of Freedom for his work in public service. **bt**

FAIT Fellowship: U.S. Department of State Clearance Processes

Part of the eligibility requirements for the Foreign Affairs Information Technology Fellowship (FAIT) program is your ability to obtain and maintain medical and security clearances and suitability requirements. Here is a summary of what these clearances entail.

Security Clearance Process

The security clearance determination process begins when fellows are selected for the fellowship. Fellows will be asked to submit fingerprints to the Department’s Bureau of Diplomatic Security as the first step in the security clearance process. As soon as individuals are selected for the fellowship, the Department of State requests that they complete and submit an application, within about two weeks, as part of the continuing security clearance determination process.

The time needed for security clearance determination processing varies depending on a number of factors. The security clearance process involves a comprehensive background investigation, conducted by the U.S. Department of State in cooperation with other federal, state, and local agencies. This investigation provides the information necessary to determine a candidate’s suitability for appointment to the Foreign Service and for a Top Secret security clearance.

The process considers such factors as: failure to repay a U.S. Government guaranteed loan or meet tax obligations; failure to register for the Selective Service; past problems with credit or bankruptcy; unsatisfactory employment records; a criminal record or other violations of the law; drug or alcohol abuse; and less than honorable discharge from the armed forces.

Candidates who hold dual citizenship, have had extensive travel, education, residence and/or employment overseas, or who have foreign contacts, a foreign-born spouse, immediate family members or relatives who are not citizens of the United States, should be aware that the clearance process will take longer to complete. The background investigation includes interviews with current and previous contacts, supervisors and coworkers. Candidates who do not receive a security clearance are ineligible for the fellowship.

Medical Clearance Process

Fellows must obtain and maintain medical clearances in order to remain in the program. Medical exams are done at the State Department during the orientation period. The medical clearances often take a couple of weeks, although the process can be longer depending on the situation. Fellows will receive decisions on their medical clearances from the State Department.

The Office of Medical Services of the Department of State determines a candidate's medical fitness and ability to serve overseas. Many Foreign Service posts are located in remote areas with extremely limited medical support. Each fellow, therefore, must meet rigorous medical standards in order to qualify for the required worldwide medical clearance. Medical clearance determination by Medical Services is based on its thorough review of each fellow's medical history and a physical examination, including an individual assessment of his/her specific medical needs and the medical capabilities of Foreign Service posts to meet those needs.

The Department's Office of Medical Services determines whether a candidate is medically eligible for assignment to all Department of State posts worldwide. While a candidate may effectively manage a chronic health condition or limitation within the United States or in specific areas outside of the U.S., the Office of Medical Services might well determine that the same individual is not eligible for a worldwide ("Class One") medical clearance. Such clearances may only be issued to candidates whom the Office of Medical Services deems able to serve at the most isolated and restricted overseas posts.

Some posts could face extreme isolation due to limited air and other transportation service, and unreliable Internet, telecommunications and postal and delivery systems. Any of these limitations can have a severe adverse impact on the availability of required medical services and supplies or delay timely medical evacuations.

Some countries have inadequate infrastructures such as a poor or negligible public health care system, poor sanitation, unreliable electricity and a lack of potable water. There may also be infectious and communicable diseases, such as malaria, dengue fever, typhoid, tuberculosis, rabies, encephalitis, and gastrointestinal diseases. There may be no health unit at the post and next to no local medical facilities. The local emergency room, for example, might be completely inadequate, without ventilators, defibrillators, x-ray capabilities, etc. There are often no blood banks or limited medical supplies and medications available locally. Due to political instability, security could be a concern. Fellows should be aware that these posts are neither few in number nor confined to a specific geographic region.

There are numerous posts where conditions appear similar to that of the U.S. but which also suffer from some of these restrictive characteristics. As a result, stress levels among employees may be very high. Given these concerns, Fellows must be able to obtain and maintain the required medical clearance to remain in the program.

Suitability Review Clearance Process

Upon completion of the background investigation and medical examination, a State Department Suitability Review Panel will examine your file (minus any privileged medical information) to determine your suitability for employment with the Foreign Service.

The attainment of U.S. foreign policy objectives depends substantially on the confidence of the public (both American and foreign) in the individuals selected to serve in the Foreign Service. The Department of State, therefore, requires the highest standards of conduct by employees of the Foreign Service, including an especially high degree of integrity, reliability, and prudence. Given the representational nature of employment in the Foreign Service, employees must observe proper standards at all times. The purpose of the suitability review is to determine, from the candidate's total record, whether the candidate is indeed suitable to represent the United States. The Suitability Review Panel has the authority to terminate a candidacy.

In evaluating suitability, the Suitability Review Panel takes into consideration the following factors:

- Misconduct in prior employment, including marginal performance or inability to interact effectively with others.
- Criminal, dishonest, or disgraceful conduct.
- Misrepresentation, including deception or fraud, in the application process.
- Repeated or habitual use to excess of intoxicating beverages affecting the ability to perform the duties and responsibilities of the employee's position.
- Trafficking in or abuse of narcotics or controlled substances.
- Reasonable doubt as to loyalty to the U.S. Government.
- Conduct which clearly shows poor judgment and or lack of discretion which may reasonably affect an individual or the agency's ability to carry out its responsibilities or mission.
- Financial irresponsibility, including a history of not meeting financial obligations or an inability to satisfy debts.

AIR FORCE SBIR/STTR HBCU INITIATIVE

STAY ENGAGED | BE INFORMED | GET INVOLVED

The United States Air Force (USAF) Small Business Technology Transfer (STTR) Program, worth \$97M, is seeking technology to enhance our warfighting capabilities. We are reaching out to all HBCUs with a unique opportunity for funding research and development (R&D) through strategic partnerships with small business partners like you.

Our USAF STTR Program has streamlined our acquisition processes to remove barriers to entry and standardize proposal submission processes with the distinct intention to share how easy it is to participate with the United States Air Force and Department of Defense (DoD) Small Business mission partners as a prime or subcontractor on DoD contracts.

Desired Outcome: “... From Grants to Contracts”

To increase Historically Black Colleges and Universities (HBCU) and Minority Servicing Institutions (MSI) participation in the U.S. Air Force and U.S. Space Force Small Business Technology Transfer (STTR) Programs.

Overarching U.S. Air Force STTR Vision:

Encourage engagement and increase program participation amongst universities and small businesses to produce technology in the form of good or service, usable by the military or commercial sector.

Vision of our HBCU Collider Initiative:

Engage with HBCUs/MSIs to support the development of science, technology, engineering, and mathematics (STEM) capabilities in support of USAF needs and to alleviate competency gaps between HBCU/MSIs and traditional research universities.

Supporting Our Mission:

The mission of the United States Air Force is to *fly, fight* and *win...* in **air**, **space**, and **cyberspace**.

OUR GOALS:

1. Increase HBCU/MSIs participation in the USAF STTR research funding source program by submitting proposals and increasing award metrics,
2. Connect HBCUs with emerging trends in the U.S. Air Force, and
3. Establish strategic alliances with U.S. Air Force, U.S. Space Force, and HBCUs.

OUR OBJECTIVES:

1. Increase awareness of the Air Force STTR program,
2. Educate the target audience on the STTR program, processes, and policies,
3. Reduce barriers to entry, and
4. Increase HBCU participation in STTR program.

“HOW TO” GUIDE FOR AIR FORCE BROAD AGENCY ANNOUNCEMENT

Special Topics

Air Force SBIR|STTR Special topics provide a multi-phased approach to partnering with commercially viable U.S.-based businesses with 500 or fewer employees in order to solve Air Force problems.

This approach allows for development and adoption of commercially viable technologies as integrated components of major programs of record, or as operationally effective commercial-off-the-shelf solutions.

Additionally, SBIR|STTR Special topics give the U.S. technology ecosystem a competitive edge, ensuring secure supply chains and access to critical technologies in a global marketplace.

SEED OPTIONS

Firm-fixed-price contracts with SBIR/STTR funds that allow small businesses to assess application of their commercial technologies/concepts to Air Force mission needs

BRIDGE THE GAP

Higher dollar contract with SBIR/STTR funds to execute a demonstration or develop a prototype for applied evaluation
Private or program fund matching option drive up SBIR investment!

TRANSITION - Eligibility for sole source government contracts.

When a company has proven value, unit or program dollars can be used to purchase products and services, fund continued technology development and integration or achieve program-of-record status

HOW TO ENGAGE IN THE PROCESS

GATHERING PROBLEMS

PEO's, program managers, MAJCOMs and operators identify problems, capability gaps, technology gaps, or tech-interest areas.

Topics are published in the triannual SBIR|STTR BAA as either independent Special Topics, or as addendums to the Open Topic.

APPLYING & RECRUITING

Companies apply for Phase I awards in areas they find most relevant.

Government teams who have invested in problems can recruit via:

- social media
- govt websites
- events
- commercial tech conferences

AWARDS & CUSTOMER DISCOVERY

Contract awards are made in batches by Air Force SBIR|STTR for Open Topics, or by owners of a Special Topic. These quick contracts ask companies to do one thing:

Discover government problems and submit a proposal on how to solve them

Government personnel connect companies with operators, maintainers, logisticians and technologists to help them understand DoD problems and develop solutions.

MAKING INVESTMENTS

Phase I awardees are immediately eligible for sole source government awards. These may be executed as a purchase by a base team, by a program office for further development or integration, or established as a program of record.

- Companies can start work fast with Phase I SBIR|STTR funds while government offices align technologies, programs and funding.
- Companies can develop prototypes or execute demonstrations on Phase II SBIRs to allow units to “try before they buy.”
- Investor partnerships and tools, like accelerators and incubators, can be paired with Phase II SBIRs to mature and commercialize technologies.

There are many support resources, tools, government teams and companies available to help. To get started, visit:

<https://www.afsbirsttr.af.mil> or www.afwerx.af.mil/sbir.html

Black History Month 2022

In 2011, Earl A. Pace, Jr. was inducted into the **IT Hall of Fame** as an innovator for co-founding BDPA, formerly known as **Black Data Processing Associates**. BDPA was founded in Philadelphia in 1975.

TRAILBLAZING DIVERSITY IN THE QUANTUM INDUSTRY

Dr. Percy Pierre

Creating an equitable and inclusive quantum ecosystem is a top priority for many members of QED-C and MQA. To ensure we achieve this goal, this webinar shares relevant workforce development trends and celebrates best practices developed by diversity trailblazers, past and present. Dr. Percy Pierre, a luminary in STEM workforce development and the first African American to earn a PhD in Electrical Engineering in the US. Leaders from IBM will then share their insights from launching the largest quantum D&I program to-date, i.e. the IBM-HBCU Quantum Center, which provides many HBCU students and faculty access to IBM's Quantum Network, research opportunities and curricula.

TOPICS

- The current state of competitiveness and diversity within the STEM and quantum workforce
- Impacts of past programs in addressing diversity and inclusion in the STEM workforce
- Experiences in standing up large scale D&I programs and projects across multiple levels
- How HBCUs and other partners can attract and retain more African Americans in STEM fields

For 40 years, BDPA has enabled the upward mobility of African Americans and other minorities in the Information Technology (IT) and STEM fields. Through its 40+ local community chapters in major cities across the United States, BDPA has been at the forefront of promoting the minority agenda within the IT profession since 1975. BDPA has been a leader and pioneer in technology and STEM training for IT professionals and High School students since 1986.

Norman Mays, founded BDPA of Greater Washington, D.C. (BDPA-DC) and BDPA Cleveland. His 40-year journey with **Black Data Processing Associates** (BDPA) began in 1975, when founders Mr. Earl A. Pace, Jr., and the late David Wimberley created BDPA's Philadelphia Chapter. He heard about the organization from Mr. Wilbur McReynolds, a mutual friend of **Earl A. Pace, Jr.**, BDPA's Co-Founder. At that time, Mays was a Captain in the U.S. Army, stationed at Ft. Meade, Maryland and assigned to the first official US Army organization dedicated to Computer Systems Security. After being invited as a speaker at one of the Philadelphia Chapter's monthly program meetings, and coming to understand the value of BDPA's mission statement, Mays joined BDPA in 1976, not realizing that he had begun one of the most rewarding experiences of his life. Norman Mays is shown above during BDPA-DC's **40th Anniversary Gala** with the Chapter's High School Coding Competition (HSCC) teams.

National High School Computer, Coding, and Cyber Competitions

Est. 1975

BDPA photo by Charlie Perkins

National BDPA's **High School Computer Competition (HSCC)** hit 2001, the first century of our 3rd millennium, with reckless abandon. Over 25 teams from participating BDPA Chapter cities fielded teams for annual national scholarship rounds.

Powered by **IBM, Mayo Clinic, and Rochester Public Schools**, National BDPA's **Southern Minnesota HSCC Team** (above) became the most diverse set of "top coders" and **#JrDevs** in the nation amassing more world HSCC Championships than all other BDPA Chapters combined. They closed out 2K's first decade with four consecutive HSCC Championships by 2010 and one more in 2011 — **five championships in a row**.

The bar is raised each year for every HSCC team heading to **#BDPACON**, National BDPA's annual technology conference.

Being connected to the Internet is essential for being competitive in a global economy. Access to technology empowers youth to obtain real-world experience in science, computer programming, and mathematics that will allow them to find high-tech jobs in the future.

Jesse L. Bemley
Ph.D. Founder, Joint Educational Facilities, Inc.

OCTO

everyone@connect

Office of the Chief Technology Officer (OCTO)
District of Columbia

As the Founder of District-based **Joint Educational Facilities**, **Dr. Jesse L. Bemley** launched BDPA's *National High School Computer Competition (HSCC)* Program as well as BDPA's *National I.T. Showcase Program*.

For over three decades, thousands of BDPA Student Members in the National Capital Region and across the United States have directly and indirectly benefited from Dr. Bemley's innovation and foresight across advanced computational topics rapidly evolving today — many have since received graduate and STEM degrees.

Commemorating Black History Month

© 1990 Marvin T. Jones & Associates for I-Plus Magazine/BDPA-DC

The Hewlett-Packard Company (HP) co-hosted an event for Joint Educational Facilities (JEF) and BDPA Student Members interested in HP's Unix (HP-UX) operating systems and artificial intelligence (Ai).

HP-UX was HP's proprietary implementation of the Unix operating system (OS), based on UNIX System V and first released in 1984.

In this historic 1990 photo, the three students (center) in this session later developed an Ai "**Model of a Black Teenager**" using Prolog while at JEF. They eventually received masters degrees and lead IT projects, today!

Commemorating Black History Month

BDPA Chicago © 1990

In the early 1990's, National BDPA's **Chicago Chapter** became the nation's largest and most influential BDPA Chapter by developing and nurturing corporate advisory councils (CACs) with leading I.T. employers and banks across the region. **BDPA Chicago** also published local and national newsletters with ads and CAC funding.

(Seated L-R) **Belinda Betts**, **Sheila McCaskill**, **Debra Rice**, **Wanda Brown**, and **Dee Jones**. (Standing L-R) **Jeff Jordan** and the late **Ollie Morgan**, Chapter President and publisher.

You've probably seen **Mario Armstrong** on TV as a two time *Emmy Award-winning* talk show host and Digital Lifestyle Expert® or as a regular contributor on NBC's TODAY Show, CNN, and NPR. Or maybe even on Inside Edition, Dr. Oz, Steve Harvey, or Rachael Ray.

Mr. Armstrong is host of the Emmy winning *Never Settle Show*, the world's first crowd-produced, livestreamed talkshow with live participation from in-studio and online audiences. Mr. Armstrong is shown above interviewing **Denise Hebner**, Head of Diversity and Inclusion Americas for UBS on **BDPA-TV**, during BDPA's 2008 Conference.

Commemorating Black History Month

Perry Carter joined BDPA in 1983 as co-founder of Temple University's BDPA Student Chapter. Upon graduation and completion of Naval ROTC, Carter served as a Data Systems officer in the United States Marine Corps. He served as the Public Affairs Officer for the National Naval Officers Association (NNOA) and founding publisher of *NNOA Meridian*, BDPA's *I+Plus Magazine*, and *bdpatoday*. In 1990, Carter Chaired National BDPA's annual Technology Conference and Career Expo in Washington, D.C. In 1996, Carter led BDPA's transition to the Internet as the organization's first Web Master successfully launching BDPA.org with **Silicon Graphics**, **HP**, and **U.S. Black Online** during BDPA's annual Technology Conference in Atlanta.

Commemorating Black History Month

Students participate in a weekend industry day and inner-city open house at the Joint Educational Facilities (JEF) training center in Washington, D.C. **Dr. Jesse Bemley**, BDPA DC and JEF Executive Director co-hosted a High Performance Computing (HPC) primer with **Dr. Paul Gray**, University of Northern Iowa, (shown above) for area youth, October 15, 2006.

"Little Fe", as opposed to "Big 'Iron'", is a portable HPC computational cluster for educational use developed by Dr. Gray's team.

INFORMATION TECHNOLOGY SENIOR MANAGEMENT FORUM

Fostering the career growth
of African-American executives

photo credits: ITSMF, NSBE, and Per Scholas

The **Information Technology Senior Management Forum (ITSMF)**, formed in 1996, began with conversations between prominent technology executives who found that only 3% percent of information technology management roles were being held by Black professionals. Studies suggested that not enough Black professionals were positioned for senior-level technology positions nor projected across BDPA's pipeline and tech industry executive staffing models.

This discussion sparked those executives to action as they were compelled to reach, teach and cultivate those aspiring technology professionals. Under the leadership of Carl Williams, the 501c(3) organization was founded in Chicago, Illinois and began the work of recruiting those Black professionals who ranked among the "Who's Who" in technology; as well as those companies and individuals looking to support the mission of the organization.
